y Ciencias Forenses
Delegación de Madrid

The title "Massive Sequencing: Forensic applications" is displayed on a dark gray rectangular background. "Massive Sequencing:" is in white, and "Forensic applications" is in green. The green text is also highlighted with a green glow effect. To the right of this panel is a vertical orange bar with a pattern of concentric circles and dots.

Massive Sequencing: Forensic applications

Objectives of the new working commission

A survey on the level of implementation of this technology – future perspectives

Organize a first collaborative exercise in 2017 or 2018 (on the samples of the GHEP proficiency test, with the help of Koro)

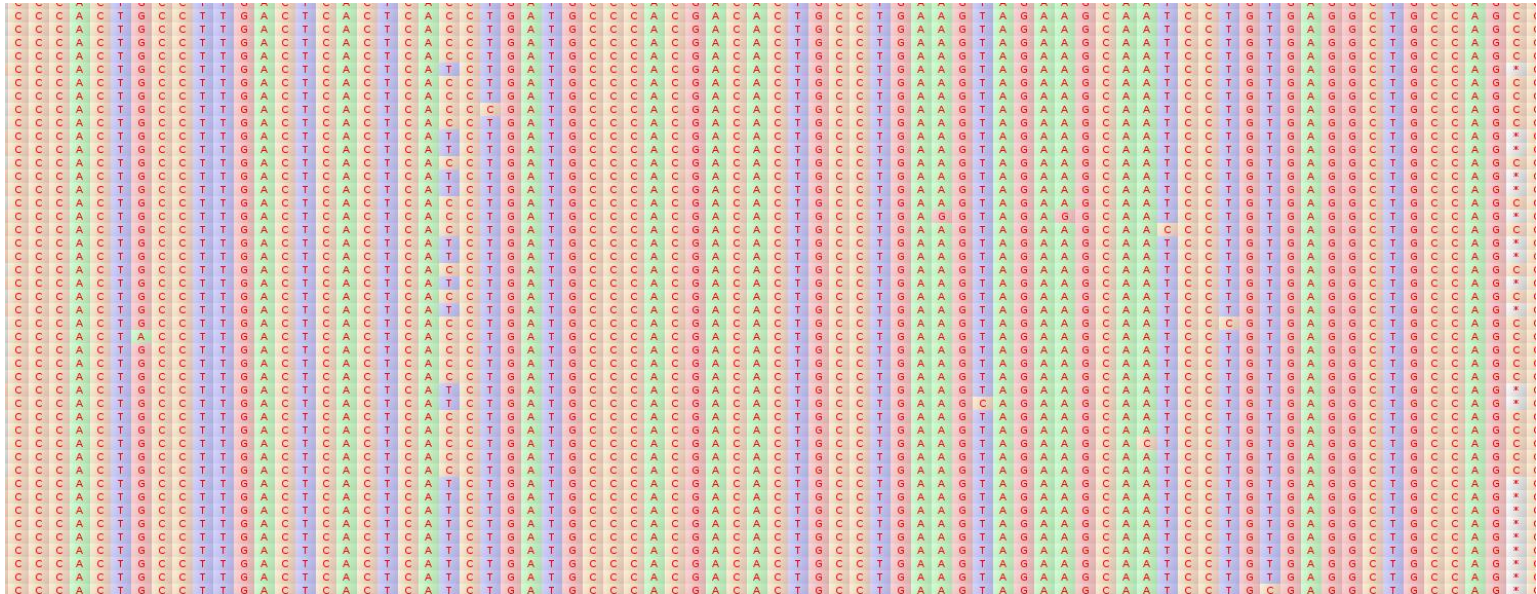

Promote:

- collection of population data
- validation data
- collaboration with international databases (STRIDER, EMPOP & YHRD)

Types of data

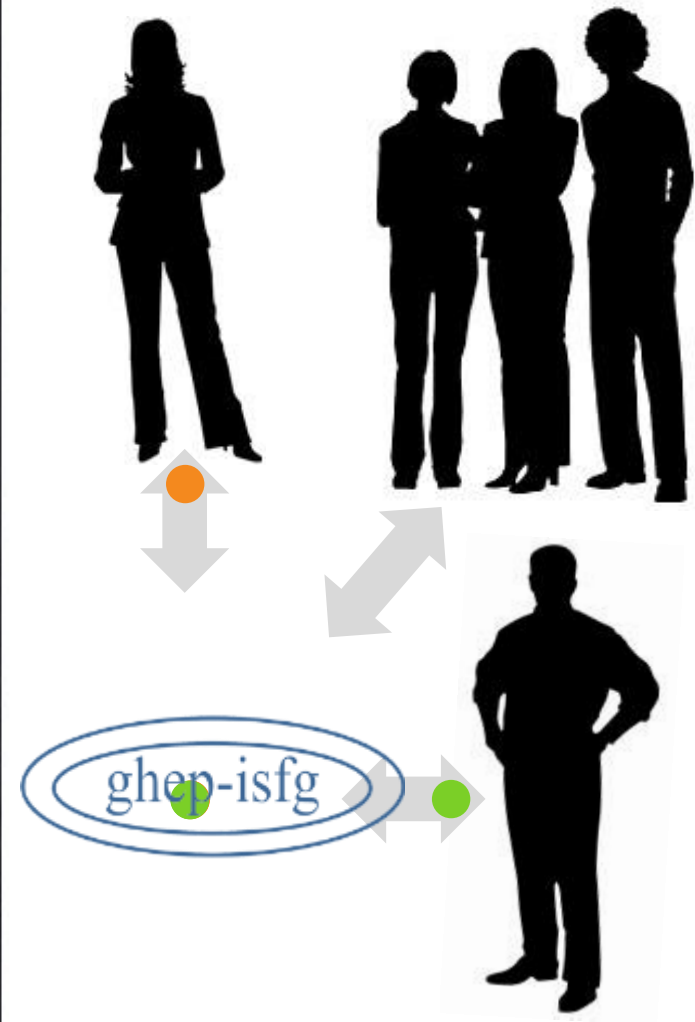

Autosomal STRs
Sex Chromosomes
mtDNA (Control region and whole genome)
Ancestry-informative panels
Phenotypic-informative panels

Collaboration

Antonio Alonso
Leonor Gusmão
Chris Phillips
Óscar García
Lourdes Prieto

The important thing is to collaborate and
work together
The GHEP has a lot of experience on this!!
